

Offering *GALVALUME[®] The BIEC Journey* for sale

A history of Galvalume[®] sheet technology, BIEC International and the ZAC Association is now available in a beautiful, hard bound book entitled *GALVALUME[®] The BIEC Journey*.

The book chronicles the story behind the research and development of 55% Al-Zn (Galvalume sheet) technology. The book is compiled from first-person accounts submitted by the research, production and marketing personnel who were involved in the effort. The 160-page book is a must-read for those who use or sell Galvalume sheet products. It represents the first time the complete story behind the development of the 55% Al-Zn technology has been told.

The book also highlights the tremendous growth of Galvalume sheet products throughout the world, celebrates the product's achievement of reaching 100 million-tons of cumulative production in 2008 and chronicles the 30-year corporate history of BIEC International as well as the development of the Zinc Aluminum Coaters (ZAC) Association.

The book includes an actual, embossed sample of 55% Al-Zn material incorporated into the cover. Please contact BIEC at contact@biecint.com with any questions you may have; or you may purchase a book by completing and sending the completed form below with your check.
